EDWARD D. EASTON, President.

NATIONAL BISCUIT COMPANY.

The regular quarterly dividend of ONE AND HEE QUARTERS PER CENT. on the Perferred Sock has been declared payable August 18ts, 1906, be stockholders of record at the close of business August 18th, 1906, to August 31st, 1906, both adustye.

F. B. BUGBEE, Treasurer.

### IST. PAUL ROAD COMPETITOR.

Extension. St. PAUL, Minn., Aug. 12.—A little railroad contructed a year ago by farmers between Bioux Falls and the St. Paul road twenty-five miles north is coming into prominence as a factor in the J. J. Hill system. This road, known as the Dakota Midland, was graded by the farmers along the line, but who fur-aished the capital for the rails and rolling tock has always been a m stery. Now it is alleged that J. J. Hill was the man who Inanced the road and secured control to a like is announced that he is preparing to extend anced the road and secured control of it. road into South Dakota and Iowa, parFINANCIAL AND COMMERCIAL. ELEGANT SUITE OF OFFICES to sublease for five years corner of 44th St. & 5th Ave. Suitable for a Stock Exchange House. Amply HARRY A. WILKES, World Building, Tel. 3822 John.

Midland is to be extended northwest to Huron. where the Great Northern reaches into central South Dakota. This would give the Hill roads a tremendous pull on traffic, even if the Dakota Midland did not go into northern Iowa, along the St. Paul's territory.

Judge Lochren of the Federal court has issued an order which puts the ticket, scalpers of St. Paul, Minneapolis and Duluth out of business until August 20, when argument for a permanent injunction will be heard. The order was obtained by six.railc.ads centring in this city and is prohibitive. The action at this time is to head off the traffic in tickets by visitors to the National G. A. R. encampment this week, when the low rates made by the roads would result in a flood of tickets getting into the scalpers' hands.

The St. Paul and Northwestern reads are each laying rails west from the Missouri River at a rapid rate, while the Minneapolis and St. Louis is putting down five miles of track a day in its struggle to reach the Missouri River from Watertown, S. D., in time to carry off the fall grain crop. All three of these roals could push the work along more rapidly if they could get the necessary men to work on construction. But as it is they have the men concentrated where the work is most difficult and are jogging along with track Midland is to be extended northwest to Huron

NEW \$10,000,000 COPPER CO.

BUYS MEXICAN MINES NEAR THE GREENE CONSOLIDATED.

Col. Greene, J. D. Byan and Thomas F. Cole Among Those Interested-Percentage of Copper in Butte Ores Increases During July-Development in Utah Mines.

CALUMET, Mich., Aug. 8.-The Cananea Central Copper Company has been incorporated under the laws of Minnesota with a capital stock of \$10,000,000, the main office being located at Duluth. The directors include W. C. Greene of Cananea, Mexico; John D. Ryan of Butte, Mon.; James Hoatson of Calumet, Mich., and Charles A. Duncan, George A. Tomlison, Joseph H. Cotton, William J. Oleott, Chester A. Congdon and Thomas F. Cole, all of Duluth. For \$4,743,000 the new company has secured what is known as the American group of claims, 223,000 shares of the Cananea and Duluth Mining Company and 3,000 acres of mining land surrounding these \$,000 acres of mining land surrounding these properties at Cananea, Mexico, adjoining the Greene Consolid ated mine. The new company issued \$600,000 shares of stock at par, \$10 a share, which was oversubscribed in a few hours. It will be seen by this that \$1,600,000 will remain in the treasury for the development work after the mines are paid for. The new corporation is composed mainly of people

askard which we over the most are paid of company will remain in the treasury for the development work after the mines are paid for. The new corporation is composed mainly of people who are heavily interested in the North Butte, and the sum of the work after the mines are paid for. The new corporation is composed mainly of people who are heavily interested in the North Butte, and the sum of the work and arizona companies, which rank among the most important copper concerns in the world.

The Tamarack Mining Company, which owns the old Cliff mine in Reweensw county, Mich. has decided to start work underground at that property, which has been idle for men years. No. 3 shaft will be cleaned out and its openings extended. It is planned to investigate the amygdaloid beds which traverse the Cliff property and to find if any ottless.

Atter seven months idleness the Tamarack Mining Company is still handleapped by the gain Nos. I and 2 shafts, and it is problematical when it will be possible to resume producing for seven months, but on the workings that it is unsafe for men to been producing for seven months, but on the workings that it is unsafe for men to be north ago and is now shipping more rock months ago and is now shipping more rock in the workings in the mine probably is very small, nevertheless the company has lost a strength of the metal market.

Negotiations are under way for the purchashy of the metal market.

Negotiations are under way for the purchashy of the metal market.

Negotiations are under way for the purchashy of the metal market.

Negotiations are under way for the more mines of Lake Superior down the more many of the more mines from

BUTTE, Aug. 6.—There was a reduction in ore tonnage mined in the Butte district but an increase in the pounds of copper produced in July. There was a very general increase in the percentage of copper contained in the ores mined, and especially in Anaconda, Parrot, Trenton and Red Metal. The total copper production for the month was 35,22,370 pounds, against 32,576,700 for June, an increase of 1,345,670 pounds. The ore bonnage in July was 438,480, against 437,550 in June. The July production by companies was as follows:

07e. 117,800 127,100 19,220 17,360 10,850 17,050 31,000 40,300 29,450 6,200 4,650 15,500

Pounds of Copper. 8,952,800 9,151,200 1,345,400 1,249,820 1,185,000 4,185,000 2,170,300 620,000 348,750 1,162,500 Totals.....436,480 33,922,870 Between 16,000,000 and 17,000,000 pounds of copper were turned out by the Washoe smelter at Anaconda, and it is stated that with the improvements now being made the capacity and output will be fully 20,000,000 pounds a month. The output of the Boston & Montana smelter at Great Falls was about 10,000,000

and output will be fully 20,000,000 pounds a month. The output of the Boston & Montana smelter at Great Falls was about 10,000,000 pounds in July, and that plant is also being pounds in July, and that plant is also being so that it will be able to handle from 500 to 800 tons of ore more daily.

The Lewisohn General Development Company has abandoned work on the Altoona mine, one of a group upon which it has a lease and bond. The old workings are between 300 and 400 feet deep and were filled with water. The Lewisohns pumped out the water and examined the workings without opening any more ground, concluding that the showing did not justify further exploration. The company is now engaged in sinking a shaft on the Montgomery, a claim lying further north and adjoining the Bullwing further north and adjoining the Bullwing further north and soloning the Bullwing further north and south, whereas all so be found in the Montgomery. The peculiarity about the new discovery is that the vein runs north and south, whereas all other veins in that district, including those of the Pittsburg & Montana Co., strike east and west and have been traced up to the lines of the Bullwhacker. That within a comparatively few feet from the east and west veins a big vein should be found running at right angles is considered remarkable.

Another ore discovery that is regarded as of great importance to Butte mining interests has been made in one of the claims of the Butte Hill Copper Mining Company, which is exploring a lot of ground a mile or more further north than any other copper mine. At a depth of 200 feet a crosscut has been run more than 100 feet through ledge matter, and an eighteen inch seam of ore has been cut through that assays nearly 3, per cent. copper and twenty ounces of sliver to the ton. The find is chiefly valuable because it settles affirmatively the question whether there is copper and twenty ounces of sliver to the ton. The find is chiefly valuable because it settles affirmatively the question whether there is copper and t

will be increased to 1,500 or 1,800 tons of ore a day.

F. A. Heinze, who has secured control of an immense porphyry dyke located in the Rimini mining district about eighteen miles southwest of Helena, will test the big deposit by diamond drills. The surface of the dyke carries a value of \$3 in gold to the ton, which can be worked at a profit. For the purpose of ascertaining the values at depth the diamond drill will be used. Depending on the results of the borings Mr. Heinze contemplates building a large plant for treating the low grade ore, of the dyke.

It is reported that F. A. Heinze is negotiating for the Rex group of mines in the Cœur d'Alene countrys. He aiready has secured control of the Stewart mines.

UTAH.

SALT LAKE, Aug. 8.—During the week the

## AN ESTABLISHED MINING INDUSTRIAL GUANAJUATO AMALGAMATED GOLD MINES

INCORPORATED UNDER THE LAWS OF THE STATE OF NEW JERSEY.

600,000 Shares, Par Value \$5.00 Each. Capital, \$3,000,000.

Owning and Operating the Famous "Negociacion de la Paz" Group of Gold and Silver Mines, at La Luz, Guanajuato, Mexico,

The Greatest Mining District in the World The Stock of this company is one of the most desirable investments on the market to-day, combining absolute safety with every

possibility of paying enormous dividends. FIRST DIVIDEND WILL BE PAID JANUARY, 1907.

A limited block of stock now offered at par

\$5.00 per share

Stock allotted as subscriptions are received.

The Guanajuato Amalgamated Gold Mines Company owns the world famous "Jesus Maria," "Villarino," "Sangre de Cristo," "Providencia," "Remedios" and "Dolores" mines, all on the La Luz vein at Guanajuato, Mexico, which, under antiquated Mexican methods of mining, have an officially recorded production of over \$25,000,000, with only a small portion of the properties developed.

There are now hundreds of thousands of tons of rich ore awaiting treatment, on the dumps, uncovered and in sight. In the undeveloped portions of the mines, according to our engineers, there is practically an inexhaustible supply of ore that should grade higher as depth is reached.

To treat this ore at the minimum cost the company has equipped the properties with one of the

MOST COMPLETE MINING AND MILLING PLANTS IN THE WORLD,

which has been installed by the following companies: Allis-Chaimers Company, Milwaukee, Wis., a 100 Stamp Mill, with a daily capacity of from 300 to 400 tons. Westinghouse Electric and Manufacturing Co., Pittsburg, Pa., thirteen 30 to 50 horse power Electric Motors and a 51/2x6 inch Deane Triplex Power Pump.

Mexican Mine and Smelter Supply Company, Mexico, Air Compressors and Concentrators.

Wellman Seaver Morgan Company, Cleveland, Ohio, Electric Hoists. United States Steel Products Company, New York, Steel for Construction and 52 Cyanide Tanks.

C. L. Banks, Guanajuato, Mexico, Masonry and Foundation Work.

Peter Schuttler Company, Chicago, Wagons and Trucks for Transportation.

Other materials and work have been furnished by W. S. Tyler Co., Cleveland, O.; American Tool Works Co., Cincinnati, O.; Nordberg Mfg. Co., Milwaukee, Wis.; Blaisdell Co., Los Angeles, Cal.; Mexican General Electric Co., Victor M. Braschi & Co., T. Schnob & Co. and Hoffman, Pinther & Bosworth, all of Mexico.

The Company has completed a large dam with a storage capacity of over 70,000,000 gallons of water, built tramways from shafts to mill, and has about installed every necessary improvement above and below ground to insure the most complete success of the Company's undertakings.

The ore will be under treatment in a short time, and the first dividend will be paid January, 1907. Under these conditions we present this stock as an investment and not as a speculation. It is a great mining industrial-safe, sure and substantial. Profits are assured both in dividends and the increasing value of the stock.

This is the last opportunity to secure stock at

\$5.00 per share

The right is reserved to withdraw this offer without notice.

We present this stock for subscription with our unqualified endorsement and recommend its purchase.

PROSPECTUS AND FULL PARTICULARS ON REQUEST.

**COLONIAL SECURITIES COMPANY** 57 BROADWAY,

NEW YORK, N. Y.

company is now in the East and the belief here is that previous to his return the shares of his company will be listed on the Boston exchange. The mine is producing well.

The Utah and Eastern Copper Company, which owns the famous Dixie mines and a good smelter in Washington county, this State, is doing some heavy work just now to place everything in shape for a large production of copper bullion. A traction engine and wagon train with a capacity for hauling more than forty tons at a time is now operating on the first fifteen of the thirty-cich.

Two Thousand Men on the Company Payrolls in Goldfield. mately 2,000 men are now on the payrolls of the operating companies and at prospects owned by individuals. As these men re-ceive from \$4.50 to \$6 a day, it means that over \$10,000 daily is being dropped into business channels from this source alone.

The \$250,000 milling plant of the Goldfields Reduction Company, a French syndicate, is being placed in commission as this letter is written. It is one of the most complete and up to date mills in the State. It has a capacity of easily 500 tons of ore a day and employs the amalgamation and cyanide methods of gold recovery. Word from Ely to-day is to the effect that

the Nevada Northern Railroad is running construction trains within twenty miles of camp and that the grade is completed within sixteen miles. Ely will be connected with the outside world early next month if no further trouble is had with the construc-

tion gangs.

Reports of big discoveries and a stampede into the old Bullion district region, Lander county, are reaching here and men are quietly pulling out for the new diggings. Six miles worth of Bullion the discovery of a great porphyry belt, that gives gold assays of betporphyry belt, that gives gold assays of better than two ounces wherever the rock is knocked off, is reported. The discoverers were Colorado men and it is said that they have succeeded in gobbling up a great deal of ground. The Gold Quartz Company, a Montana crowd operating in the district, is preparing to install a holsting plant. The company is shipping considerable ore that averages better than \$100 in gold and silver and reports are that it has a mountain of \$25 free milling gold rock upon which a plant will be erected when development has sufficiently progressed.

ciently progressed.

The Clark road is waiting for ties with which to complete the line from Las Vegas into Rhyolite, the heart of the Builfrog district. Bullfrog will hum when this road is completed, as the mines have been getting ready for it for more than a year.

Patsy Clark, the Butte operator who is mining in the Furnace Creek region of the Funeral Range, was in Rhyolite this week. He spoke very enthusiastically of conditions at the Furnace Creek Copper Company's mines. The main operating shaft has reached a depth of 1,200 feet, and the bottom is still in high grade carbonate ores. A tunnel is

in high grade carbonate ores. A tunnel is soon to be started on the opposite side of the mountain which will open the mines to a depth of over 1,600 feet.

Goldfield operators who have just returned from Pioche express the opinion that that camp is going to boom. The railroad from Caliente is assured, but, like the line to Rullfrog, construction is being held up pending the arrival of ties. With the completion of the road to Pioche it is believed that Osceola and all the country between Pioche and Ely will boom.

At the Tecopa mines, tighty miles south of Bullfrog, fifty men are unployed and shipments of ore will be commenced within a few days, is being the purpose to send out an average of fifty tons a day. A haul of fourteen miles has to be made from Tecopa to the Clark road and a wire tram will be built.

NBVADA.

SEATTLE, Wash., July 31.—The prediction made last spring that the gold production of Alaska would exceed all previous seasons is verified. Up to June 30 it had reached over \$10,560,000. Twenty shipments had passed through the United States Assay Office, and the general prediction was that \$11,000,000 to \$12,000,000 yet remained to be marketed. Many sry sanguine that the total will reach a round \$15,000,00.

The travel to Alaska bids fair to continue lively for the next four months. While it is not expected that all will remain and work in the mines, more will engage in development than usual.

ment than usual. The mills are all busy.

COLORADO SPRINGS. Aug. 10.—A company is being formed to drive the Gatch Park general drainage tunnel at Cripple Creek. The capitalization is \$1,000,000.

The Jo Dandy and New Haven mining companies have been consolidated, thus settling important controversics. The Jo Dandy pays 500,000 shares of stock to the New Haven stockholders for their property. The purchaser quiets the George Hatch tax claim by payment of 75,000 shares, and all other indebtedness by payment of 150,000 shares. The amount necessary has been subrcribed in New York. The New Haven will centinue to exist in order to own a claim not sold. Both properties are old Cripple Creek producers.

About 400 prospectors are in the Spaulding district, the new Custer county gold field.
Cyanide mills are being built in various parts of Cripple Creek and other Colorado mining camps to treat low grade ores in mines and dumps.

The M. E. Harriman, Black Heath and Emma claims in Ross Gulch, near Silverton, have been sold to the Grand Mogul Mining Company for \$150,000. The Grand Mogul company is controlled by New York and Pittsburg capitalists.

The Big Five Company will expend \$100,000 in driving the Central tunnel, Idaho Springs, to cut the Hudson, Lake, Speole Payment, Bellman, Crown Point and other mines. COLORADO.

MONTANA.

MONTANA.

HELENA, Aug. 5.—There is some excitement in northern Montana over the discovery of gold in what is thought to be paying quantities about three miles from Havre. Several residents of that city grubstaked a prospector named Haywood and he worked on the claims for five weeks. The first rock at the grass roots showed \$4 in gold. Others seoured samples which ran considerably higher, and this becoming known, a stampede resulted. Already a restaurant and a saloon have been established at the site of the discovery. Practically every resident of Havre has staked out a claim and the supply of location notices was exhausted.

The receipts of gold at the United States assay office in this city during July aggregated \$183,324.03. This is a falling off of \$60,000 as compared with the corresponding month last year, which may, however, be explained by the fact that Fergus county, the State's leading producer, showed a great slump, due to trouble with water. This has been remedied. Because of this breakdown in Fergus county, at the Kendall and Barnes-King mines, Lewis and Clark county was the leading producer in July, with \$48,079.99, a gain of more than \$8,000 as compared with June, due in large part to the great activity in the Marysville, Gloster, Red Mountain and other districts contiguous to Helena. The receipts during July were from the following sources: Montana, \$199,245; Idaho. \$5,28; Nevada, \$8,426; Washington, \$494; California, \$216; British Columbia, \$5,805; old jewelry, \$509.

A strike of gold ore running from \$300 to \$1,000 a ton is reported in the Jay Gould mine near Helena, recently purchased by Chicago and Milwaukee capitalists. So rich is the ore that it is being shipped to the smelter for treatment instead of being handled at the company mill.

company mill.

Boise, Aug. 8.—Advices from Salmon City
Lemhi country, are to the effect that the source
of the channel tin deposits of the Prairie
basin country has at last been discovered.
Eli Minert of Salmon City, who owns the old
placer mine at the head of Big Creek, has
been tracing his tin "float" for more than a
year past. Now he says he has discovered the
ledge from which it cameland that it is in place.
Mr. Minert is exhibiting some fine samples
of tin ore in which the metal appears in the
form of cassiterite. The ore makes in a
granite-trachite dyke structure and the percentage of metal is appearently high.

Latest information from the Lost Packer
Company's gold-copper bonanza in the Loon
Creek district, Ouster county, makes it cuits
out the containing the country of the containing the contain

in camp for several days. Some time ago Mr. Snyder bought outright the Warren group and organized the Nevada-Fairview Company to develop it. Yesterday he added six more claims to the company's holdings.

John A. Kirby, consulting engineer and one of the big owners of the Nevada Hills property, was in camp for a couple of days. Mr. Kirby found that there was not a single place in the Nevada Hills property that did not disclose ore worth from \$150 to \$300 a ton, and he was much elated.

ALASYA smelter which was completed too late last fall to handle the ores that had frozen up solid in the smelter receiving bins. A big strike of ore averaging better than two ounces in gold in addition to the copper, was made in tunnel No. 4 during July, and it has been turning out bigger and better as development in the rock has progressed. James Ivers, one of the big men in the Silver King property, of Park City, Utah, and Miles Finlen of Butte are the controlling factors in the Lost Packer.

Butte are the controlling factors in the Lost Packer.
Under the direction of John Treweek, a mining engineer, the Sunnyside mines of the Belle of Thunder Mountain company at Roosevelt have been developed from prospects of doubtful value to proved gold mines in less than one year. He was called to the company's headquarters in Pittsburg a short time ago to consult with the leading interests in the company, and the data he was able to lay before them resulted in his being commissioned to erect a cyanide plant in connection with the amalgamation mill. He says he will have the plant remodelled, and in operation by the end of October and that he will then lace the company on a self-systaining basis.

SALT LAKE. Aug. 8.—During the week the Mammoth Mining Company, operating in the Tintic district, has marketed ninety-eight tons of gold ore that sold for over \$12,000, and within the next few days it will ship another lot equally as valuable. This ore was preduced in addition to the eighteen carloads of ordinary grades of copper and gold ores from various portions of the mine. The company dend for payment on July 20. The Mammoth mine is now being operated to a depth of 2,280 feet, and the sulphide ore zone has not yet been reached.

The management\_of the Little Bell com-

feet, and the sulphide ore zone has not yet been reached.

The management of the Little Bell company, operating at Park City, has just made public a statement covering July's production. It shows that during the month eight lots of ore aggregating \$15 dry tons were marketed and that the company, after deducting the costs of sampling, assaying and smelter treatment charges, realized over \$45,000, or better than \$1,500 a day. The company is now installing a new compressor plant.

The City Rocks company of Alta is now installing a short tramway to connect with the upper terminal of the Continental company's five mile line, and within the next few days City Rocks ore will be going over the neighbor's line. This will out out the upper canon wagon haul and save the City Rocks company, which is now beginning to ship heavily, about \$1 a ton in the cost of getting its ore to the smelter. During the week the City Rocks company handed out \$30,000 more on the purchase price of some of its properties. Another \$45,000 will clean up the ground purchase account and leave the company in a position to begin the building of a surplus.

President John 3. Daily of the Daily-Judge.

II.
